Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

Team gathering
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

Set the goal
Think about the problem you'll be focusing on solving in the brainstorming session.

Learn how to use the facilitation tools
Use the Facilitation Superpowers to run a happy and productive session.

Open article

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

Handwritten Digit Recognition with Neural Networks

PROBLEM
How might we provide a well effective novel digit recognition using neural networks?

Key rules of brainstorming
To run an smooth and productive session

Stay in topic.

Encourage wild ideas.

Defer judgment.

Listen to others.

Go for volume.

If possible, be visual.

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

Padmasri

Brainstorming and clustering ideas to solve the problem

Remove ideas that are not relevant to the problem

Make Application real time

Nivedha

To create application that detects handwritten digit

Validate and test with custom input

Priyadharshini

Can Implement Fraud Detection

Train the MNIST dataset

Use for pattern recognition applications

Punitha

Can Implement Fraud Detection

Train the MNIST dataset

Use for pattern recognition applications

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes

Process	To create an application that detects handwritten digit	To implement application that detects handwritten digit	To create an application that detects handwritten digit	To implement application that detects handwritten digit	To create an application that detects handwritten digit
Features	A feature to generate images of handwritten digits	A feature to support the generated images	A feature to generate images of handwritten digits	A feature to support the generated images	A feature to generate images of handwritten digits
Technological Solutions	Validate and test with custom input	Train the MNIST dataset	Implement application that detects handwritten digit	Train the MNIST dataset	Implement application that detects handwritten digit
Applications	Use for pattern recognition applications	Can Implement Fraud Detection	Train the MNIST dataset	Implement application that detects handwritten digit	Train the MNIST dataset

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

Share the mural
Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.

Export the mural
Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward

Strategy blueprint
Define the components of a new idea or strategy.

Open the template

Customer experience journey map
Understand customer needs, motivations, and obstacles for an experience.

Open the template

Strengths, weaknesses, opportunities & threats (SWOT)
Identify strengths, weaknesses, opportunities, and threats (SWOT) to develop a plan.
